

Shape2BAKE[®] re-useable pan liners vs. parchment paper

Save 90% of your costs AND eliminate the disposal of used papers!

A NEW Solution:

Does your business use disposable parchment paper or waxed paper to line sheet pans or other trays? How many cases do you purchase per month? Let us show you how we can saving 90% of your costs AND eliminate the disposal of used papers...

A Shape2BAKE pan liner is a Teflon coated fabric that can be re-used thousands of times, saving you money and eliminating waste. It is a direct replacement for parchment paper.

Case Study – parchment paper costs:

As an estimate, you pay around \$72.00 per case of 1000 sheets for mid weight paper liners. If you are able to use each sheet TWO times, then the cost is about **3.6¢ per bake**.
(\$72.00 divided by 2000 = 3.6¢)

Shape2BAKE pan liners cost about twice that for a case of 24 sheets but each sheet is guaranteed to last at least 1500 cycles costing you 10 times less per bake - **0.4¢ per bake!**
(24 x 1500 = 36,000 times and \$140.00 divided by 36,000 = 0.0039) Your cost may be less in volume.

You also save the cost of waste disposal while helping our environment by eliminating another consumable throw away item!
