

SHAPE2BAKE®

Patented baking / freezing molds, pans, belts & liners

Our strength is your security...

WRH specializes in rugged, dependable food handling and processing solutions made from extraordinary designs and materials.

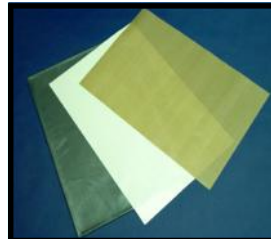

We appreciate this opportunity to serve you and earn your business.

Unlimited design options—multiple cavity, single cavity, custom shapes, molded logos

Bread forms

Cut to fit pan liners

Flexible candy molds

Roll stock belts

Flexible or rigid, non-stick, sanitary Teflon® copolymers eliminate product damage, cups, parchment, oils, packaging, flour and consumables

Broad temperature tolerance exceeds -80°F to +550°F (-60°C to +290°C)

Performance benefits:

- **Lighter** than stainless steel and aluminum AND **does not require coating or glazing**. Our pure polymer **withstands thousands of temperature cycles**.
- **Eliminates consumables** reducing extra steps, costs, fats, and calories
- **Flexible de-molding** quickly releases baked/frozen products without damage
- **Will not add or transfer food odors or contaminants**

Cleaning and sanitation benefits:

- **Stain-resistant**, inert and stable against preservatives and sanitation chemicals
- **Remove baked-on debris** without presoaking, scraping/scrubbing
- **Complies with FDA regulations** as a material for direct food contact.

Application examples:

BAKERY - Sheet pans, bun toaster liners, baguettes, breads, cakes, muffins, pies, pizza, cheesecake, pastries, pound cake, continuous oven belting

CONFECTIONERY - Starch-less candy castings, gelatin/pectin-based molds, chocolate molds, casting jellybeans, marshmallow, hollow goods, shell casting, gum drops, jelly fruit slices, and solid chocolate shapes

MISC. APPLICATIONS - Soap castings, candle molds, meatloaf tubes and pans, ice cream brining, frozen products, roasting pan liners, tunnel drying belts

CUSTOM DESIGNS are available with fast turn-around and low cost tooling
