

Flexible or rigid moulds serving confectionery industry applications

CUSTOMIZABLE | FLEXIBLE OR RIGID | EASY-TO-DEMOULD

SHAPE2CAST®

PATENTED CASTING MOULDS PANS, BELTS & LINERS

Moulded shapes made from flexible or rigid, non-stick, sanitary co-polymers

UNLIMITED, CUSTOM DESIGNS

YOUR LOGO HERE

» PERFORMANCE BENEFITS:

- FLEXIBLE SOFT POLYMER OPTION simplifies demoulding
- ENCAPSULATED STAINLESS STEEL frames and carriers can be customized to your equipment for structural rigidity, where needed
- RIGID POLYMER option will not crack or lose its surface finish over time unlike traditional polycarbonate moulds
- EXTREME -60°C/-75°F to 285°C/550°F tolerance
- Lighter than stainless steel or aluminum AND does not require coating or glazing
- Our engineered polymers withstand thousands of production cycles
- Eliminates consumables such as starch and release sprays, reducing extra steps and costs
- Will not add or transfer food odors or contaminants

» CLEANING & SANITATION BENEFITS:

- Stain-resistant, inert and stable against preservatives, detergents and sanitation chemicals
- BPA-free materials comply with FDA regulations for direct food contact

» CONFECTIONERY APPLICATION EXAMPLES:

- Starch-less castings of gelatin/pectin-based or starch-based confections
- Chocolate moulding, chocolate centers, hollow goods, shell casting, and solid chocolate shapes
- Hard sugar confections, fondants, caramels, marshmallow, nougats, etc.
- UNLIMITED, CUSTOM DESIGNS in multiple cavity, single cavity, custom shapes, and moulded logos are available with fast turn-around and low-cost tooling

Shape2CAST moulds complement our Shape2BAKE line of products serving bakery, pastry and other applications, including: Sheet pans, bun/toaster liners, baguettes, breads, cakes, muffins, pies, pizza, cheesecakes, pastries, continuous bakery oven belting, soap castings, candle moulds, meat tubes and pans, ice cream brine freezing, frozen products, roasting pan liners and moulded tunnel drying belts.
