# WRH EDIBLES SOLUTIONS

*We offer medicated THC and CBD edibles solutions so you can produce gummies, hard candies, chocolates, even baked goods on our lines of depositing, moulding, cooking and cooling systems and equipment.*

## WRH MOULDS

WRH moulds are designed to fit the industry standards in moulding lines, from hand moulding, through 6, 8, 11 and even 24-across depositor lines, ensuring the growth and scale of your operations.

- Custom and standard moulds featuring your logos, dosages and state-mandated symbols
- Unique capabilities to place your logos and symbols into cavity bottoms and even SIDEWALLS
- Our "OIL MOULDS" are made from self-lubricating material formulations and eliminate/reduce labor, oil and release sprays

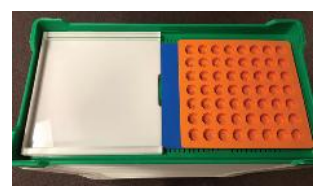

## WRH COOLING/DRYING AND PROCESSING TRAYS

- Our self-stacking trays cool, dry and manage your edibles from depositing to packaging
- Multiple product depths from 1.5", 3" and 4"

### Options:

- Turnkey solutions, from recipes to equipment specifications and supply chains
- Gummy production lines and fast set, vegan, pectin, gelatin recipes
- Carrier plates and slip plaques to handle our moulds through your depositor stations and cooling trays
- Enzyme washing stations and tunnel washers to clean and sanitize your food grade moulds, pans, tools and production equipment

**\$\$\$ Lease Financing Available \$\$\$**

# WRH DRYING APPLICATIONS

## VACUUM BATCH DRYERS PRESERVE TERPENES

- Unique proprietary vacuum technology gently dries without oxidation
- Batch cycle in 12-hour dry and cure at ambient temp (72F/23C)
- Eliminate flat spots, crusting, and oxidation in our one-step dry and cure
- Dry your wet/saturated colas, flower and harvests direct from the field
- No high heat, minimal power requirements, and simple touch screen PLC
- Three dryer sizes to match your yield, scale and expansion plans

iDry's DRY  
and CURE  
under VACUUM

BIOAVAILABILITY

ORDER EARLY AND DEFER PAYMENTS INTO HARVEST SEASON!

## SELF-STACKING DRYING TRAYS RACKS AND DOLLIES

- Self-stacking trays lock as they stack, for a 50% space savings over racks and pans
- Our new 36" x 36" x 3" self-stacking racks are optimized for colas and extraction biomass, and light enough for one person to handle
- Multiple heights and airflow configurations, featuring 1", 1.5", 3" and 4" loading depths tailored to manage your smokable flower, cola, craft hemp and bulk extraction biomass
- Popular in drying rooms, batch and tunnel dryers and also cooling and drying edibles
- High-temp rated option to manage DECARBOXYLATION and autoclave cycles

## KIT BINS - MODULAR HARVESTING AND STORAGE BULK BINS

- Vented, variable height bins that nest for storage
- One bin design to handle planting, fresh harvest, refrigeration, dry and bulk storage
- Build-up/break-down kit bins as you go into three heights; makes hand-loading and unloading a breeze
- Multiple sizes and formats available; also designed to fit and integrate with WRH self-stacking racks for multiple level drying and storage capacity

## Scalability and Labor Savings Options:

Bulk extraction tunnel dryers in larger footprints • Perforated tray liner options to increase airflow  
Enzyme washing stations and tunnel washers to clean and sanitize • Stacker/de-stacker systems
